About the Magazine

Adaptive behavior is an listed, global peer reviewed magazine that publishes original research and evaluation articles on adaptive conduct in organic systems and autonomous synthetic structures.

Considering the fact that 1992 it has supplied ethologists, psychologists, behavioral ecologists, laptop scientists, philosophers, neuroscientists, and robotics researchers a forum for discussing new findings as well as for evaluating insights and tactics throughout disciplines. The magazine explores mechanisms, organizational concepts, and architectures that can be expressed in computational, bodily, or mathematical fashions related to the both the capabilities and dysfunctions of adaptive behavior.

The magazine publishes articles, opinions, brief communications, goal articles and commentaries addressing demanding situations inside the cognitive and behavioral sciences, and along with subjects such as belief and motor manipulate, embodied cognition, learning and evolution, neural mechanisms, motion choice and behavioral sequences, motivation and emotion, characterization of substances and environments, decision making, collective and social conduct, navigation, foraging, conversation and signaling.
