About the Magazine

Building Acoustics is a quarterly peer-reviewed magazine involved with acoustics within the built surroundings. The aim of the magazine is to be the primary publishing option for authors writing on constructing acoustics and related topics, in addition to a forum to combine the relevant research network of the sector. Potential readers are scientists, experts, engineers, architects, developers and representatives of public bodies wearing out research and development inside the area of acoustical elements of buildings. There's an emphasis at the utility of new information and the supply of statistics beneficial to the practitioner.
