## About the Magazine

The magazine of high performance Polymers is an global peer-reviewed journal that publishes the very best satisfactory authentic research in excessive performance polymer science and technology.

With a most important consciousness on molecular shape/processability/assets relationships of excessive overall performance polymers consisting of liquid crystalline polymers, fragrant polymers, aramids, heterocyclic polymers, epoxy resin, fluoropolymers, siloxanes, functionalized polymers and inorganic polymers.

"I keep in mind excessive overall performance Polymers to be a valued booklet: one which I consult often to hold me abreast of studies traits within the chemistry and generation of overall performance polymers and composites." Ian Hamerton, university of Surrey, united kingdom
