## About the Magazine

Child magazine is the ultimate guide to parenting and takes expectant mums and doting dads all the way to pre-teen with their kids. Child is a friendly, positive and comprehensive magazine that embraces all aspects of parenting: pregnancy, birth, growth, development, health, discipline, behaviour, education, activities and games. It also examines new products, practices and offers expert advice from leading Indian specialists in relevant fields. Child's tone is friendly and open, rather than being preachy or alarmist and approaches parenthood as a time to be cherished.

Child pages are reader-friendly and packed with useful information and service for the busy parent. Child provides parents with choices and possibilities on how to best bring up their children in tune with their lifestyle.
