## About the Magazine

Welcome to the International Journal of Distributed and Cloud Computing. The journal provides forum for engineers and scientists in academia, industry and government to publish their latest research findings in any aspects advanced conceptual background and practical application of Clouds and related systems. It also considers other paradigms as Peer to Peer (P2P) computing, Cluster computing and Grid computing. Coverage extends to issues of performance, management, governance, trust and privacy, and interoperability of Clouds.

First issue onwards, Journal is indexed with Proquest database. It is also encouraging to note, researchers not only from India but all across the globe are showing their interest for publishing their esteemed research work with the Journal. Still we believe there is a need to communicate new ideas in the area of computing from Indian and International perspective.

All of the papers that are submitted to the Journal will be initially screened by our editorial team and further reviewed by our editorial board members without disclosing identity of authors. Completion of review process

takes around 3-6 months time period. If a manuscript is unique, on occasion specific outside reviewers will be added to the Board for purposes of review. We are committed to developing a Journal which is responsive to the needs of the readership and to the discipline. This will make it easier to maintain a balanced and objective point of view in editorial content and provide content at a level which readers find informative and useful.
