About the Magazine

Journal on Structural Engineering provides a forum for a broad blend of scientific and technical papers to reflect the evolving needs of the structural engineering and structural mechanics communities. The Journal highlights and documents these recent advances, to allow for comparative studies of such advances, and to document future research needs in the field of structural engineering. Typically, published papers describe the development and implementation of new analytical models. The Journal aims to focus on high quality papers from academia and practitioners in all areas pertaining to Structural Engineering.
