About the Magazine

Electrical and Electronics Engineering is a dynamic field which involves development and application of modern technology such as analogue and digital circuitry, microelectronics, microprocessors and memory devices, signal processing and data communications, control and expert systems, electromagnetism and telecommunication, electric machines, power systems and electricity distribution systems. The rapid development and innovation in these areas in the last two decades have undoubtedly improved our life a great deal in various aspects and the trend is expected to continue in the future. Realizing the growing importance of this field, IUP has come up with a quarterly journal, The IUP Journal of Electrical and Electronics Engineering.
